Projects

Tutor Media

Jan 2024 - Apr 2024

https://besttutor.xyz/

This was a client project is a tuition platform where students can access tutoring services, and guardians can post tuition listings.

- Optimized Loading Time: Utilized Laravel's query optimization techniques to reduce loading time for large user data sets by 80%, from 10 seconds to 2 seconds, improving system performance.
- Cost Savings: Implemented efficient database queries resulting in a cost reduction of \$2,000 per year in server maintenance expenses due to reduced server load.
- Revenue Growth: Integrated payment integration features that led to a 15% increase in revenue, generating an additional \$10,000 in profits over 6 months.
- Enhanced User Engagement: Developed SMS and email service interactions resulting in a 20% increase in user engagement, measured through click-through rates and response rates.
- Scalability Improvement: Implemented scalable architecture solutions enabling the system to handle a 50% increase in user base without compromising performance, ensuring smooth operation during periods of growth.
